**Fundraising with COTA is better than GoFundMe:**

- ▶ Raise more money
- ▶ Know funds are secure
- ▶ Receive a lifetime of support

"I have told so many transplant families about COTA! I always say to each and every family ... COTA is the best decision you will ever make. Our family simply could not have afforded so many parts of Alice's journey to date. COTA allows a transplant family to breathe easier and to have hope. COTA made Alice's transplant possible. COTA will continue to be our lifeline ... *for a lifetime.*"

Tara Rivera, Parent of COTA Kid, Alice

## Why Choose COTA?

The Children's Organ Transplant Association provides support and fundraising assistance to families facing a life-saving transplant. COTA is a 501(c)3 nonprofit and is the largest organization dedicated solely to helping transplant families raise funds for transplant-related expenses.

- ▶ COTA never charges a fee.
- ▶ 100% of funds raised in honor of transplant patients are available for a lifetime of transplant-related expenses.
- ▶ Fundraising websites are provided free of charge.
- ▶ Innovative fundraising strategies and volunteer training are offered.
- ▶ Proven virtual fundraising ideas and guidance are shared.

Contributions to COTA are deductible to the fullest extent of the law. Since 1986 more than \$150 million has been raised across the country for thousands of children and young adults needing an organ, bone marrow or stem cell transplant.

COTA also works with individuals of any age with single gene disorders, such as Cystic Fibrosis, Polycystic Kidney Disease and Sickle Cell Anemia.

*"Finding an organization like COTA that is dedicated to transplant families' financial and emotional needs has been a huge blessing. Transplant is not a cure. It provides a much better quality of life, but requires costly medications, treatment and monitoring. We simply feel secure knowing COTA exists to help families like ours navigate transplant journeys . . . for a lifetime."*

Sara Siqueiros, Parent of COTA Kids, Isabel, Jason and Jaxon
